Center for Veterinary Biologics Suite 104 510 South 17th Street Ames, IA 50010 (515) 232-5785 FAX (515) 232-7120 Subject: Issuance of a Conditional License for Sarcocystis Neurona Vaccine,

Killed Protozoa

To: Area Veterinarians in Charge, VS

State Veterinarians

Veterinary Services Management Team Directors, Center for Veterinary Biologics

The Animal and Plant Health Inspection Service (APHIS) has issued a conditional United States Veterinary Biological Product License to American Home Products Corporation, Establishment No. 112, Fort Dodge, Iowa, for the manufacture and distribution of Sarcocystis Neurona Vaccine, Killed Protozoa.

A veterinary biological product regulated under the Virus-Serum-Toxin Act must be shown to be pure, safe, potent, and efficacious before a veterinary biological product license may be issued. The regulations in 9 CFR Part 102 regarding the licensing of biological products provide that a conditional veterinary biological product license may be issued to meet an emergency situation, limited market, local situation, or special circumstance. The special circumstance addressed here is the need for a product to aid in the prevention of equine protozoal myeloencephalitis. Conditionally licensed products are required to be pure and safe, and have a reasonable expectation of efficacy.

The conditional license was issued on the basis that American Home Products Corporation, has demonstrated that the product has a reasonable expectation of efficacy. Safety of the product has been established through field safety trials. American Home Products Corporation has provided a written commitment to APHIS to complete studies to demonstrate the efficacy of this product and to conduct any other work required for full licensure. APHIS will evaluate their progress later this year. The conditional license will expire in six months.
